PERSONAL PROJECTS

Interactive chatbot for food delivery app

- Built a chatbot using a Dialog flow for a food delivery system. This helps to interact with customers to easily help in resolving issues. Used Mysql as database.

Loan prediction using Machine Learning

- Created a predictive model that helps financial institutions make informed decisions about loan approvals to customers. Used technologies like Python and its frame works. Algorithms like K-Means , Random Forest .

Morse Code Converter

- Developed a website to translate morse code. Used HTML, CSS and Javascript. This is simple encryption decryption technique used for security issues and for confidentiality. With this the user can translate a morse code to english or convert his own text to morse code.
